It's been 8 years since the events of episode.01 and his dream is still to stand where no man has stood before, and in order to do so he still needs a ludicrous amount of capital. With the economics of lunar city going out of control what is going to happen next?

This game is cute graphics wise. Love the art style. I'm a sucker for everything cel-shaded or borderlands-esque graphics. People getting killed and eaten by a Lion, still looks cute lol.

Concept is pretty nice as well. You get random missions and you have to keep up until you get new prey and other stuff introduced and the game gets harder and harder as military and hunters start hunting you. You can buy upgrades for your Predator lion and make him even more deadly. So there's a bit of RPG elements involved.

Sounds gets a bit repetitive so that's the only bad thing imo.

There's even a selfie button where you can take pictures of your Lion. Also a lot of references to meme's and funny easter eggs.

Good game and worth it for \$6.. Nice content overall.. I used to enjoy playing this game, it was really fun, and so I would probably recommend this game.

That is, I would recommend this game, IF I COULD PLAY IT IN THE FIRST PLACE! But the game keeps on saying "Your product key is already in use."

It's one thing for a game to mess up and cause you to stop playing that way(Glitches, Hacks, Crashes, esc.), it is another thing when THE GAME PURPOSEFULLY KEEPS YOU FROM PLAYING!. Very good game

. The game has not been updated since July 3, 2016. This is dead Early Access. Avoid.. I have played all the Lost Lands games and again...I am disappointed that the clues are so wide spread and hard to follow. I do enjoy the games but am disappointed that they are so disjointed.

This game is pretty good.

You wake up in an elevator and kill the first thing you see. sounds like a typical saturday night to me.

Okay here's the actual review. So the combat is slightly slower than most games so if you dont like that it might make you dislike this game. The blocking mechanics are neat, you can block the left center or right side of your screen. You can make baddies stagger with a well timed block. The graphics are good even though most of the game is corridoors. I played the closed alpha build and it has went in the right direction so far.

For right now in Early Access the game is a 7.5/10 For me.. It's great tutorial video He did outstanding I will recamend it but persomely javascript much easier.

but thankyou for that video. I don't recommend this game. awesome game with interesting charicters, usuly i like to play the aliens or bad team in games like this but i much perfered to play the humans

definaly would avdvis people should play this and only bad thing about the game is that their isnt more to play !!! Quirky yet fun. Brought everyone together and everyone had a blast. Wish there were more games like this, VR shines with this sort of interactive content.. The Midnight Mysteries series contains some of my favorite hidden object games. These are the more typical hybrid type games, that have some adventure elements (puzzles, moving between locations, talking to people) as opposed to the find-objects-only style.

Midnight Mysteries are interesting in that they are based on real historical events, then add some fictional what-ifs to fill in blanks or give alternate explanations for known events. As a result, not only are the fun as a game but they spark some interest in reading about the real events on Wikipedia.

MM4 goes into the death of Harry Houdini and proposes a little mystery, that maybe the accident that sped up his death was actually intentional, and if so, who wanted to kill him.
